E.O.969706011 -

Whereas, the Town of Buxton does hereby recognize the requirements for separate Public, Educational, and Governmental Television (P.E.G.)\* Access Centers, and further recognizes the value of a regional Public Access Center, which would offer each participating town a larger, better equipped facility, better training, and less duplication of equipment than several smaller Access Centers located in each town.

BE IT RESOLVED, That the Selectmen of the Town of Buxton do hereby support the recommendation of the Saco River Cable Committee to establish a regional Community Television Public Access Center whose purpose would be to provide training and equipment to the residents of the towns of Waterboro, Standish, Buxton, Hollis, Limerick, and Limington for the purpose of producing television programs about the community.

Funding for the support of this regional center shall be subsidized by the Franchise Fees (or a portion thereof) provided by each town.

Such support shall not be given unless and until the following criteria is met.

1. Citizen(s) of the Town of Buxton are duly appointed as representatives to a Regional CATV Regulatory Board.
2. The Selectmen of the Town of Buxton have approved the rules and regulations of the operation of the Access Center which shall contain provision for an annual review to determine whether the Access Center is meeting the needs of the Town of Buxton.

\* Note: The Educational Access Center would be located at the School designated by the appropriate school district and the officers of the town(s) that are served.

The Governmental Access Center for each town would be located in the town office of each town on the Saco River Cable System as listed above, and would be separate from the Regional Public Access Center.

Channel Allocations shall be provided by the Cable Operator to the extent that each town requires.
